HPLC stands for High-Performance Liquid Chromatography. Before HPLC was available, LC analysis was carried by the gravitational flow of the eluent (the solvent used for LC analysis) thus required several hours for the analysis to be completed. Even the improvements added in later time we're able to shorten the analysis time slightly.

CHROMATOGRAPHY

Chromatography is a process of separation in which the components to be separated are distributed between two phases; one of which is a stationary phase and the other is mobile phase.
