The Ghost In Machine Arthur

The Ghost in the Machine is a 1967 book about philosophical psychology by Arthur Koestler. The title is a phrase (see ghost in the machine) coined by the Oxford philosopher Gilbert Ryle to describe the Cartesian dualist account of the mind-body relationship. Koestler shares with Ryle the view that the mind of a person is not an independent non-material entity, temporarily inhabiting and ...

The conclusion to Arthur Koestler's trilogy on the mind of man. It has been quite the journey, delving into this three tome work of brilliance. I loved the SleepWalkers, I loved the Act of Creation, and I liked the Ghost in the Machine. I feel that there was a lot missing from the final book in the three book work.

The Ghost in the Machine by Arthur Koestler

Arthur Koestler. Arthur Koestler brought Ryle's concept to wider attention in his 1967 book The Ghost in the Machine. The book's main focus is the movement of mankind towards self-destruction, particularly in the nuclear arms arena. It is particularly critical of the behaviourist theory of B. F. Skinner.

In two earlier books I have tried to show that throughout the ages the great innovators in the history of science had always been aware of the transparency of phenomena towards a different order of reality, of the ubiquitous presence of the ghost in the machine -even such a simple machine as a magnetic compass or a Leyden jar.

The Ghost in the Machine Quotes by Arthur Koestler

"The Ghost in the Machine" is about Wholeness as a concept, but in that respect acknowledges the nature of a part in the structure of the whole as having a recognisable identity; thus a holon can be described as, "An entity that has a boundary within its environment, from which it derives its identity" - like a blood cell, or a close knit tribal group within a larger society.

'Ghost in the Machine' is partially a concept album based on a book of the same name by Arthur Koestler. The book, which had a profound effect on Sting, is a critical attack on Behaviorist psychology, which Koestler maintains is not the panacea it claims to be but an insidious reduction of human beings to machine status.
